

## Geography

### Task one: Key concepts

The A' level specification is based on fifteen key concepts. They are:

- Causality
  - Systems
  - Equilibrium
  - Feedback
  - Inequality
  - Representation
  - Identity
  - Globalisation
  - Interdependence
  - Mitigation
  - Adaptation
  - Sustainability
  - Risk
  - Resilience
  - Thresholds
- a. Define each of these concepts and put each into a geographical context
- b. Identify each of them in news articles containing a geographical context.
- c. How do each of the concepts fit into the geography of the local area?  
i.e. Migration has **caused** there to be a cultural mix.
- Extension: Look on the Office for National Statistics website to see if you can support any of your ideas with fact.

### Task two: Investigating global issues

Pick one of the following questions.

**Disease dilemmas:** Why was Ebola a worldwide concern?

**Trade in the contemporary world:** Should we buy from Primark?

**Future of food:** Who was right, Malthus or Boserup?

**Human rights:** What is the impact of gender inequality on society?

**Climate change:** Is global climate change inevitable?

**Exploring oceans:** Can we realistically tackle the problem of 'ocean plastic'?

Research your chosen question using at least five different sources and then answer the question in 1,000 words.
