Example:

An average student is expected to be working at a 3+ at the start of Year 10, a 4- by this point in Year 10 and a 4= by the end of the year.

If at this stage this student is working at a 4= or higher they will be T+, if they are working at 4- they are T= and if they are working below a 4- then they are T-.

Why is all of this so important?

It's about improvement...and to improve you need to know where you are, then reflect
