

Target Grades Years 9-11

This is your child's target grade for the end of Year 11. It is an aspirational grade, with built in challenge, set using a range of data including the KS2 results, Cognitive Ability Test (CAT) result, the Access to Reading Test result and a national programme called Fischer Family Trust (FFT) that provides information about what learners nationally are likely to achieve on average at the end of Year 11, based on how they achieved at the end of Year 6. All targets are reviewed annually in the light of students' progress during the year. These are only a rough guide, however, and you should NOT see them as the most your child can achieve.
