

30 March 2012

Dear Parent/Carer,

Mathematics Website

The Hinchingsbrooke School Mathematics Website has been running for over 2 years now and has been greatly received by all. We are emailing you to let you know of some of the recent changes that have been made to the website and to quickly recap on what is available to our students in readiness for this summer's examinations.

<http://www.hinchingsbrookeschool.co.uk/maths/Maths%20Website.html>

Our website is a rich resource for our students. The website incorporates video tutorials, past papers, worksheets, PowerPoints, revision guides and grade descriptors. Some of these resources are protected to avoid copyright infringement. Students will need a username and password. The username is "mathswatch" and the password can be collected by your child via their Mathematics teacher.

One of our available resources has been designed to structure Mathematics revision over a longer period of time, allowing students to cover topics more thoroughly. In the KS4 section, either foundation or higher and in the unit 3 section, you will find a 16 week revision schedule for current Year 11 students. This is a set of weekly themed activities to help students revise key areas. Our video tutorials and appropriate worksheets have been structured to help students better manage their time leading up to the exams. Students have been aware of this resource for some time.

The revision schedule proved very useful last year. If you have any questions please don't hesitate to contact Ms Horlock (vlh@hinchbk.cambs.sch.uk) or Mr Woodfine (mhw@hinchbk.cambs.sch.uk) if you have any problems involving the website.

Kind regards

Hinchingsbrooke School Mathematics Department
